

Defining, Designing, and Driving Measurable Health Care Improvement

The transition from fee-for-service to value-based models is upending traditional care and payment models.

Whether you're a health care payer or provider, we understand the challenges that the transition entails, and we can help.

Using rigorous methods and objective evidence, we can help you find solutions to improve care quality and outcomes while reducing costs.

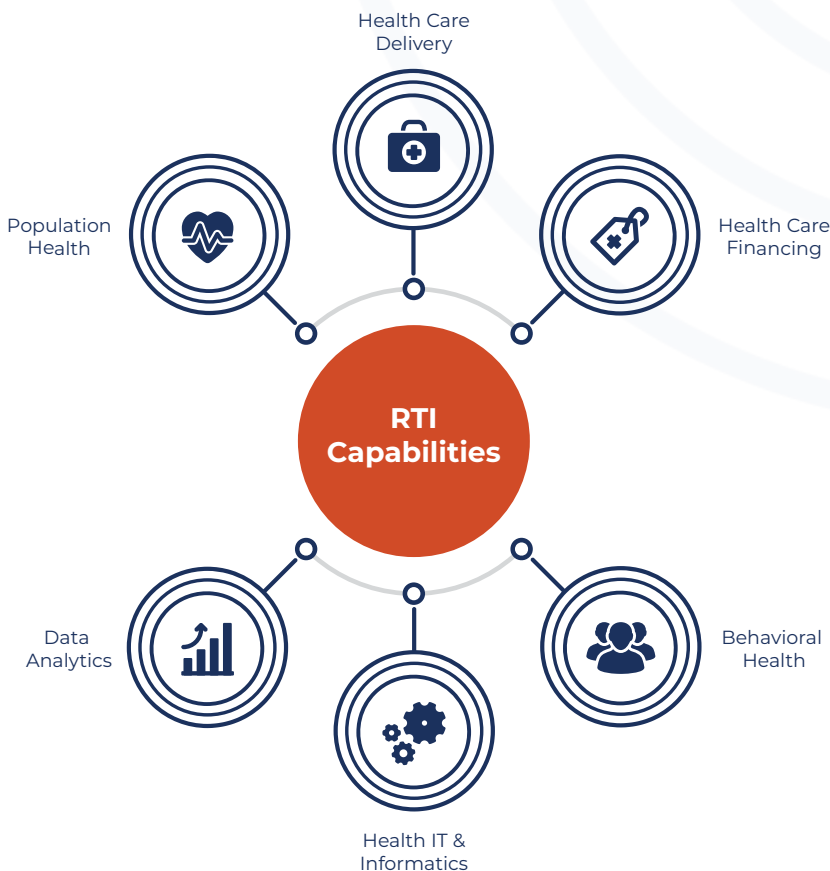

Where The RTI Center for Health Care Advancement Can Help

We are an industry leader in helping to design, deploy, and optimize value-based care solutions in the federal sector. Through our work with the nation's largest payer, the Centers for Medicare & Medicaid Services (CMS), we've helped develop and refine the complex process of transitioning to value-based care.

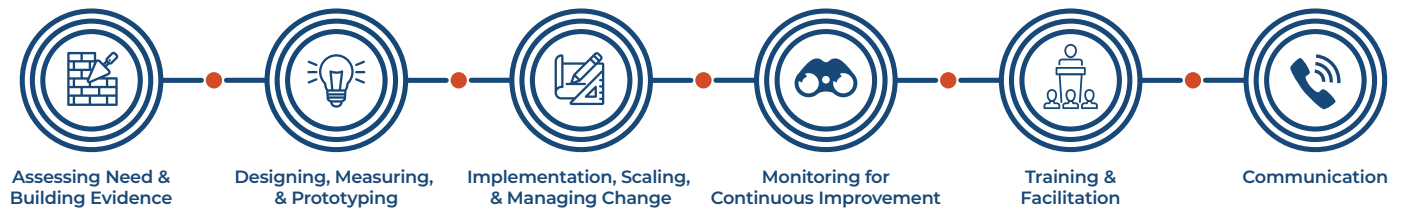

Our team of consultants and researchers have experience working in the public and private sector. We understand the intricacies of the health system and use our expertise to help solve your specific problems.

We believe in looking at challenges from every angle, so we maintain a multidisciplinary team of exceptional thinkers and trusted advisors, as well as boots-on-the-ground doers. From health economists to clinical informaticists and analysts to quality measurement experts, we have the depth and breadth of expertise needed to help your organization achieve its transformation goals.

LET'S WORK TOGETHER TO CONTROL COSTS, DELIVER BETTER CARE, AND IMPROVE THE HEALTH OF THE POPULATIONS YOU SERVE.

Our Approach

We rely on an evidence-based approach to help our clients, and the industry, make forward-thinking decisions. Above all, our goal is to improve care, make better use of available resources, and drive a value-based approach that works for payers, providers, and patients.

Working at the intersection of the public and private sectors, we have the expertise, evidence, and tools to help you improve health care and your business model.

Our experts will work with you to:

- Improve health outcomes for the populations you serve
- Inform health care delivery program design, decision-making, and outcomes
- Leverage the possibilities of value-based care
- Integrate existing data for actionable insights
- Effectively use health IT to maximize value
- Lower the cost and improve the quality of behavioral health services

The Changing Health Care Industry

The market shift toward value-based care presents unprecedented opportunities and challenges for the U.S. health care system.

Instead of rewarding volume of care as the fee-for-service model did, newer alternatives reward higher quality of care and outcomes at a lower cost.

That's easy to say, but more complex to execute. What works best for one organization can be challenging for another.

We can help you understand what works, how it works, and how it can be improved to drive value and improve care.
