

Need Value-Based Health Care Expertise?

Many companies in health care are challenged by the nuances of transitioning to value-based care. At our Center for Health Care Advancement, RTI International is leading the way in the transition to value-based health care. We helped pioneer the Medicare transition and are now a full-service advisor for all your needs from beginning to end.

Find where your organization falls in the transition to value-based care on the back of the card and learn more about how we can help make your transition easier!

Center for Health Care Advancement

What part of your transition to value-based health care could be stronger?

Design

Which value-based payment model will work best for your providers and your members? Our experts can help determine the right model to fit your needs and develop the technical parameters.

Implementation

Provider engagement is a critical success factor in any value-based payment model. We can educate and support providers to maximize the impact of your value-based transformation.

Evaluation

Has your organization already launched a value-based payment model? We can help quantify the effects of your model and refine the parameters to improve performance.

- Model selection
- Financial benchmark development
- Patient attribution
- Quality measure development
- Risk adjustment
- Social determinants of health
- Management of overlapping payment models across primary care and specialty care
- Provider buy-in
- Provider education via webinars and learning collaboratives
- Patient education and engagement
- Monitoring for compliance or unintended consequences
- Provider reports and operational support
- Effects on health care quality and outcomes
- Patient satisfaction
- Provider engagement and satisfaction
- Return on investment
- Analysis of drivers of change
- Model refinement
